

SketchCleaner Spray – Technical Data Sheet

MagPaint Europe BV
Riezenweg 2
NL-7071 PR Uift

1. Description:

SketchCleaner Spray is a clear water-based cleaning fluid. It has a distinctive odour and is intended as a detergent for SketchPaint. It is available as a separate spray or as part of a complete Cleaner Kit with Sketch Markers, microfibre cloth and spray. It can be used to fully clean SketchPaint.

2. Application:

SketchCleaner Spray is applicable to SketchPaint White and Transparent. Do not use this Cleaner Spray on BlackboardPaint. BlackboardPaint should be cleaned with water.

3. Equipment:

Use a soft (microfibre) cloth in combination with the SketchCleaner Spray. Do not use abrasive materials. These damage the surface and the erasability of the SketchPaint.

4. Instructions for use:

Spray the SketchCleaner on the surface you want to clean. Let it work for five seconds for the best result. Then wipe with a soft (microfibre) cloth. SketchCleaner can also be sprayed directly onto a wet cloth which can then be used to clean the surface.

5. Storage advice:

In a cool, frost-free place, out of direct sunlight, away from children and animals.

6 Specifications:

Commodity code:	34029090.
Colour:	Colourless.
Density:	1,001 – 1,003 kg/L (20°C).
Viscosity:	0.0 KU.
pH:	4.65 - 5.65.
Units:	125 ml - 500 ml
